МГТУ ИМ.Н.Э. БАУМАНА**

Рассмотрены основные направления научно-исследовательской работы Калужского филиала.

Main scientific trends at Kaluga Branch of the Bauman MSTU / N.D. Yegupov, S.V. Levinzon // Vestnik Mashinostroenie. 2000. No. 3. P. 111–118.

Main trends of scientific and research activity at Kaluga Branch Bauman of the MSTU, are considered. Graphical data characterising scientific and pedagogical staff (PhDs, doctors of science, post-graduates), published papers, participation in the Russian and international scientific and technical conferences for recent 10 years, and professors' participation in the scientific budgetary and contractual research, are presented. Invention activity for period of 1989–1999 is described, data about R&D performed (and being presently in progress), are given. Figs.7.
