

CONTENTS

Aviation, Rocket and Space Engineering

Aleksandrenkov V.P. Influence of Heat Exchange Intensity in the Rocket Thrust Chamber on the Cooling Channel Efficiency	4
Fedotova K.V., Aref'ev K.Yu., Sukhov A.V., Yanovskiy L.S. Research of Solid Hydrocarbon Fuel Gasification Products Mixing with High-Enthalpy Gas Flux in Uniform Cross-Section Ducts	11

Mechanics

Pavlov A.M., Temnov A.N. Symmetry Exploitation in the Natural Vibrations of Rod Systems	28
Fedorov S.V., Bolotina I.A., Strukov Yu.A. Analysis of Anti Shaped-Charge Resistance of Electrodynamical Protection with Implementation of "Shutdown" of Energy Capacitive Storage	42
Sarbaev B.S., Baryshev A.N. Calculation of Stress-Strain Curves of Fabric Reinforced Composite Materials using the Endochronic Theory of Plasticity	65
Pokrovskiy A.M., Voronov Yu.V., Pyae Phyong Aung. Mathematical Simulation of Thermal Stress in a Bainitic Steel Railroad Rail with Accelerated Normalization	76

Mechanical Engineering and Machine Science

Borovskikh V.E., Borovskikh U.V., Petrov A.A. Resource Evaluation of Machine Carrier System Elements According to Crest Value Record under Operation Conditions	88
Yaroslavtsev V.M., Yaroslavtseva N.A. High-Performance Finishing Technology in Turning with Leading Plastic Deformation	97
Panovko G.Ya., Shokhin A.E., Eremeykin S.A. On a Problem of Resonance Mode Tuning for Vibration Machines	106
Tivirev E.G., Danilenko K.B. Estimation Criteria for Tool Operating Life	112

Power, Metallurgical and Chemical Engineering

Markov V.A., Shatrov V.I. Promising Directions for Improving Automated Control and Adjustment Systems in Thermal Power Plants	121
